

## Returnee's Report

Name	Ai Zukawa
Department	Computer Science
Grade	4 <sup>th</sup> year
NITECH Advisor	Prof. Tadashi Kitamura
Exchange University	EFREI
Exchange University Advisor	P. Cupic] C.Khoury
Country, City	France, Villejuif
Duration	2.26.2011 – 3.28.2011 (31 days)

### **Program Report**

#### <Program Contents>

In the computer science class, at first we studied the process of building information systems and learned how to proceed it through exercises. We concretely learned how to make UML. And, in the project management class, we were taught integration, scope, quality, risk, cost and time management. Finally, we worked on the assignment about “Library Information System.” We gave presentations for each group in the last lessons.

#### <Achievements/Ambitions>

I could learn the outlines of project management. I knew the system of making information system by working exercises and tasks. But, it was too short to master project management, so I want to study further. I will learn management of various projects without building information systems.
