

## Returnee's Report

Name	Yasutaka Ishihara
Department	Environmental and Materials Engineering
Grade	B4
NITECH Advisor	Prof. Yuji Iwamoto
Exchange University	Imperial College London(ICL) Erlangen-Nurnberg University(UEN)
Country, City	UK, London / Germany, Erlangen
Duration	3.5.2011 – 3.13.2011 (9 days)

### **Program Report**

#### <Program Contents>

I visited ICL and UEN in this program, and took a laboratory tour. There was spacious office and there were many great facilities, especially TEM and NMR. And the level of local students was extremely high. They studied seriously and had a discussion positively. I think ICL and UEN have the best circumstances for research.

At UEN, I made a presentation about my research in English, and had a discussion with local researchers. And through local researcher's presentations, I could extend my knowledge.

At dinner or lunch, I had opportunity to contact with local students. I talk with them not only about researches but also about local culture or local lifestyle. I could enjoy talking with them in English.

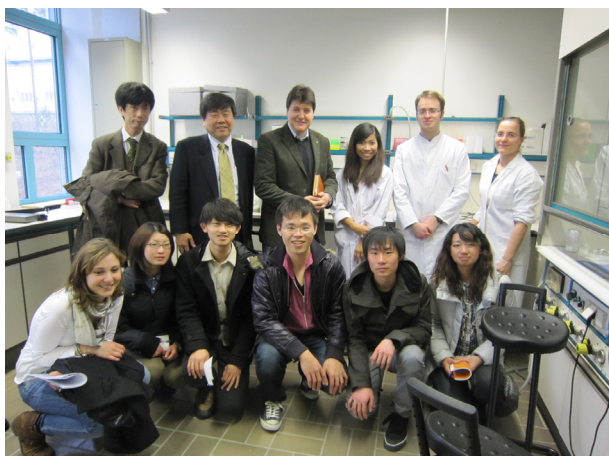

#### <Achievements/Ambitions>

In this tour, I was very impressed by professional attitude of local students to study. Their active debate and study were great. I want to learn by such attitude and make my research better.

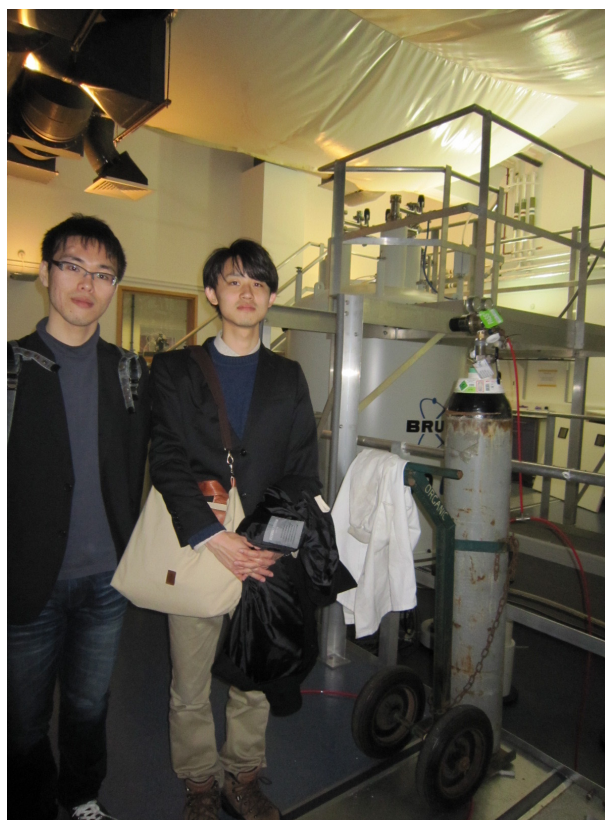

Through my presentation at UEN and talking with local students in English, I strongly felt importance of English skill. So I practice my English skill, and in the future I want to have a positive and fruitful discussion with them.

1. My presentation in English

3. With local professor and students in UEN

2. With NMR in ICL
