

## Returnee's Report

Name	Mayaka Maeno
Department	Materials Engineering
Grade	B5
NITECH Advisor	Prof. Norio Shibata
Exchange University	Imperial College London, Friedrich-Alexander Universitat Erlangen-Nurnberg
Country, City	United Kingdom, London / Germany, Erlangen
Duration	3.5.2011 – 3.13.2011 (9 days)

### **Program Report**

#### <Program Contents>

We went to United Kingdom and Germany, partner institution to inspect the study and training. The dispatch was substantial although term was short. The contents were lab tour of Imperial College London and Friedrich-Alexander Universitat Nurnberg, exchange meeting and visiting to understand another culture. I got the impression that there were many female researcher and PhD different from Japanese university. In the final day, We took a presentation about our research and had the answer and question in English.

In the exchange meeting of both universities, we talked with foreign student about many things such as working, daily life, the country's culture and so on.

#### <Achievements/Ambitions>

By participate the study and meeting, I recognized the points of difference and characteristic of Japan and foreign countries. And I'm not resistant to speak English in situation that I spoke only English. Throughout this short dispatch, listening skills are important to do communication in English. But, before then, I think it is necessary to acquire knowledge of variety field not only our field of study. Then we study abroad, I think our study and discussion would be really meaningful.

I will study English much harder and acquire essential knowledge in order to develop my research and work with other field of study.
